NICHOLAS A. TOUMPAS
COMMISSIONER

March 5, 2012

Representative Ken Weyler
Chairman
Fiscal Committee of the General Court
State House
Concord, NH 03301

Re: Dashboard – January 2012

Information

Pursuant to Chapters 223:6 (HB1) and 224:14 (HB2), Laws of 2011, the Department of Health and Human Services is providing this dashboard report, which, along with the quarterly report to the Fiscal Committee on expenditures for the Medicaid program, provides a status on demand for services in entitlement programs. The purposes of this dashboard are to:

1. Provide summary information on enrollments in several high cost programs managed by the Department,
2. Monitor high level fiscal issues to ensure sufficient funding is available for entitlement programs and for programs intended by the legislature, and to
3. Provide a summary of significant administrative and operations initiatives.

Explanation

Chapter 224:14 (HB2), Laws of 2011 provides certain restrictions and authorities for the Department of Health and Human Services to address potential budget shortfalls. Specifically, paragraph I requires prior approval of the Fiscal Committee of the General Court and Governor and Council (G&C) for any change to program eligibility standards or benefit levels that might be expected to increase or decrease enrollment in the program. Paragraph III authorizes the Commissioner to transfer funds, with the exception of class 060, benefits, within and among all accounting units within the Department, as the Commissioner deems necessary and appropriate to address present or projected budget shortfalls subject to the approval of the Fiscal Committee and G&C.

Individuals Enrolled For Services

As noted in Table 1, on the next page, caseloads continue to grow for most services, but at a much slower rate than was experienced in SFY 2011. For the seven months ended January 31, 2012, the Department provided services to an average of 154,064 individuals per month. This represented an increase of 1.5% over the prior year. While unemployment for New Hampshire has been improving and caseload growth has slowed for most need-based programs, caseloads have not declined since the recession ended and the Department continues to serve an unprecedented number of clients. The economic realities of lower wages, fewer employee benefits and increased part-time or temporary employment are factors that continue to influence service demand and delivery. Recent economic forecasts for 2012 suggest that nationally, we are at least 2 ½ years away from recovering the job losses created during the recession.

The Department's mission is "to join communities and families in providing opportunities for citizens to achieve health and independence." The largest programs managed by the Department are the food stamp and Medicaid programs, both of which are means tested programs serving low-income individuals. Caseload data contained in the dashboard represents individuals who have not achieved independence. "Poverty" is often defined as living at or below 100% of the federal poverty guidelines and "Low income" as those making less than 200% of the poverty threshold.

Table 1
Average Monthly Enrollment (Persons) Seven Months Ended January 31,

	2009	2010	2011	2012
Total Unduplicated Persons	127,724	143,485	151,876	154,064
<i>Pct Increase from Prior Year</i>		12.44%	6.05%	1.53%
Medicaid Persons	104,971	115,645	119,134	119,523
<i>Pct Increase from Prior Year</i>		9.88%	3.39%	0.53%
Food Stamp Persons	68,440	94,232	111,037	114,915
<i>Pct Increase from Prior Year</i>		37.68%	17.83%	3.49%
FANF Persons	11,368	13,863	13,817	11,862
<i>Pct Increase from Prior Year</i>		21.95%	-0.33%	-14.15%
APTD Persons	7,087	8,112	8,675	8,898
<i>Pct Increase from Prior Year</i>		14.47%	6.93%	2.58%
Elderly Nursing Services	7,153	7,310	7,229	7,232
<i>Pct Increase from Prior Year</i>		2.20%	-1.11%	0.05%

A December news report by the Associated Press headlined "Census shows 1 in 2 people are poor or low-income. Nearly half of Americans are low-income as rising expenses, unemployment shrink middle class." The report states "Safety net programs such as food stamps and tax credits kept poverty from rising even higher in 2010." While there is debate as to what should be considered poor or low income, there is little disagreement that more people are earning less money and are qualifying for assistance.

The majority of individuals serviced by the Department fall into three groups and programs to help these individuals require different approaches with differing objectives.

- Permanently Disabled: Individuals who require long term care services,
- Temporarily Low Income: Individuals who lost employment and exhausted financial resources, but who have the ability to likely recover when jobs are available, and
- Chronically Low Income: Individuals who must overcome impediments to gain financial independence.

For the permanently disabled, which includes the developmentally disabled, frail elderly and those with mental health issues, the objective is to help them maximize their abilities recognizing that for many there will always be a need for long-term services and supports. For the Temporarily Low Income, the primary assistance needed is job opportunities. In some instances, when entire industries close down, re-training and new occupations may also be required. The most complex individuals are the Chronically low income, for which safe and affordable housing is becoming an increasing concern. Other statistical data includes the following:

- In New Hampshire, 6.6% of the population lived below the poverty line. This compares to 12.5% in Maine, 10.8% in Vermont and 10.6% in Massachusetts (Money/CNN).
- 10.3% of New Hampshire's population lacked health insurance versus 9.5% in Vermont, 9.4% in Maine and 5.6% in Massachusetts (Money/CNN).
- Three-quarters of federal welfare assistance went to single-parent families and the rise in out-of-wedlock childbearing and the increase in single parenthood are major causes of high levels of child poverty (Heritage Foundation).
- 36% of the unmarried fathers had a prison record and many long prison sentences are the result of victimless drug crimes and recommitment for minor parole offenses (Brookings Institute).
- Achieving higher levels of education greatly reduces the incidence of living in poverty (US Dept of Labor). New Hampshire ranks 4th nationally with 90.9% of adults with a high school diploma. The inverse is that 9.1% lack a high school diploma (2011 New Hampshire State Health Profile, DHHS).
- Over half of all low-income children in the United States have a parent who works full time, year-round, but they work in low-wage jobs that typically offer few benefits (such as health insurance, paid sick leave, and retirement plans), little stability, and few opportunities for advancement (National Center for Children In Poverty).

Medicaid Program

Medicaid is the largest and most costly program administered by the Department. Total Medicaid costs account for in excess of 70% of total Department costs. Medicaid caseloads have stabilized but, as noted previously, remain at historic highs. Pursuant to SB147, the Department is implementing a managed care program to provide these services.

FANF Caseloads

Caseloads for Financial Assistance for Needy Families (FANF) has decreased by 14% from the first seven months of the previous year. Much of this reduction is related to termination of the two-parent program as part of the budget, as well as changes to the criteria applied to other programs for eligibility.

Disabled Caseloads

Enrollment for Aid to the Permanently and Totally Disabled (APTD) continues to grow, although at a slower pace than last year, as noted in Table 1. Legislative changes to eligibility criteria has slowed the growth rate, but the application rate for potential clients continues at high levels.

Kaiser Foundation reports on a national level the elderly and disabled represent 25% of Medicaid enrollees yet account for 67% of the Medicaid cost. In a February 2011 report, Kaiser also noted "enrollment growth among the aged and disabled has exceeded the rate of growth of the overall US population, and has significantly contributed to higher Medicaid costs due to the high cost of medical care for this population." They identified the following factors behind this trend:

- "Baby boomers," are now in the 55-64 age range, when the likelihood of disability increases and are beginning to expand the elderly population;
- New medical technologies and advances in pharmaceuticals that save, improve and lengthen lives for many—and increase the number of people living with disabilities, many of whom rely on Medicaid to pay for their care;
- Increased ability to recognize and treat chronic conditions, particularly mental health problems, which may contribute to enrollment growth among the disabled.

Food Stamps

Approximately 15% of the US population is now receiving Supplemental Nutrition Assistance Program (SNAP) services. That's an increase of 74% since 2007. Recent news accounts estimated 40% of food stamp recipients are in households in which at least one member of the family earns wages, but earns wages below the eligibility threshold for food stamps. For the year 2010, the national average food stamp participation was 14.1%. New Hampshire was third lowest in the nation at 8.5%, behind Wyoming (6.9%) and New Jersey (8.0%).

Children In Out-Of-Home Placement

The number of children in foster care has declined by 7% versus the first six months of SFY2011 and by 20% from SFY2010. Similarly, the number of children in out of home residential care has declined by 24% versus the first seven months of SFY2011 and by 30% from SFY2010. This is a result of two factors. For the past several years, DCYF and DJJS have made a concerted effort to reduce the number of out of home placements. These efforts have helped to keep children in their own homes with the provision of in-home services and have decreased the length of stay in out-of-home placements as well. A second factor is the new, more restrictive, definition for CHINS and the transition home of the CHINS children who do not meet the new definition.

Administrative Reorganization

The Department has been restructuring and downsizing the organization. The budget for SFY2012-2013 abolished 373 positions, which the Department had held vacant through attrition, thus permanently reducing the size of the organization. In SFY 2000, the Department had a budget of \$1.2 billion and approx. 2,811 filled positions, which equates to a staffing ratio of 2.4 employees per million dollars of budget. The SFY 2012 budget is \$1.9 billion and filled positions are 2,753 for a staffing ratio of 1.46. This downsizing of the organization comes at a time when the Department is also being tasked to implement mandated elements of the Accountable Care Act and transformation initiatives required by the SFY 2012-2013 budget.

Litigation & Audits

In addition to managing current operations and working toward implementation of the significant transformation initiatives required in the budget for SFY2012-2013, such as care management, mental health transitional housing, re-engineering front end operations, consolidation of district offices and health information exchange, Department resources have been necessary for addressing audits and litigation including:

- Litigation involving acute care hospitals
- Litigation involving providers of residential care for children
- Managing the disproportionate share program for SFY2012 and the related adjustment to outpatient claims
- Office of Inspector General audit of Medicaid To Schools program
- LBA financial audit of New Hampshire Hospital for the nine months ending March 31, 2011
- State Single Audit

Summary

The Department has been continually committed to making critical assessments of the current systems for management of care for clients meeting eligibility criteria and to transitioning delivery systems to more effective and efficient systems with the intended purposes of improving the value of the services delivered. These transitions require a clear definition of what constitutes a New Hampshire health and human service safety net, and difficult decisions on how best to deliver those services through new technologies and contractual arrangements with providers of those services. This message has been conveyed to staff, providers, advocates and policy makers and is the basis for the SFY 2012-2013 budget and the change initiatives in four primary areas:

Representative Ken Weyler

Page 5

March 5, 2012

1. Care management for client enrollment in the Medicaid program,
2. Reengineering service delivery systems,
3. Investing in enabling technologies and
4. Continuous process improvement.

The more substantive long-term issues are to identify and address the root causes for individuals requiring supports. According to some sources, New Hampshire is the most livable state, one of the healthiest states, ranks high on the annual survey on children's well being, among the most educated states, and has a high per capita income. What separates the low-income individuals receiving state services from the averages? High school dropout rates, the causes of incarceration in the correctional system, the availability of jobs which provide health and retirement programs, and choices made regarding healthy lifestyle options are linked. Effective solutions to the systemic issues will require a coordinated effort among several state agencies to identify and address the root causes.

Respectfully submitted,

Nicholas A. Toumpas
Commissioner

41	Notes:									
42	Shaded figures are estimates									
43	Department of Health and Human Services; Reduction in Appropriation. In the event that estimated restricted revenues collected by the									
44	department of health and human services in the aggregate are less than budgeted, during the biennium ending June 30, 2013, the total									
45	appropriations to the department of health and human services shall be reduced by the amount of the shortfall in either actual or projected									
46	revenue. The commissioner of the department of health and human services shall notify the bureau of accounting, in writing, no later than									
47	April 1st of each year as to precisely which line item appropriation and in what specific amount reductions are to be made in order to fully									
48	compensate for the total revenue deficits.									
49	* \$1 M for Managed Care is encumbered in Provider Payments 6147-101									
50	* Provider Payments includes \$4,546,464 CHIPRA transfer starting in March									
51	* Outpatient includes Pending Dept. Transfer starting in February \$14,936,218									
52	* SCHIP includes CHIPRA transfer starting in March									
53	* Pharmacy includes Pending Dept. Transfer starting in February (\$1,466,000)
